INNOVATING INCLUSION: TECH SOLUTIONS & INSIGHTS FROM WINVINAYA!

Transform Your Invoice Processing with WinVinaya's AI Solution!

Imagine this: It's month-end, and your accounting team is racing against the clock, manually entering countless invoices. The pressure is high, and errors are bound to happen. Sound familiar? Now, picture a different scenario—your team effortlessly uploads invoices, and within minutes, all data is accurately extracted, compared, and organized, freeing them up for more valuable tasks. No more tedious late hours or costly mistakes.

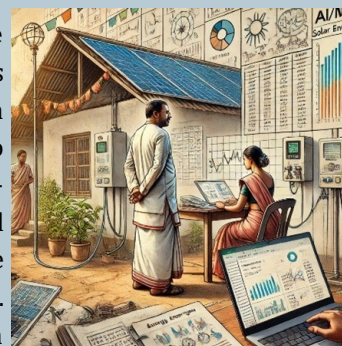

Welcome to **WinVinaya InfoSystems' AI/ML-powered Invoice Extraction Solution**—your answer to hassle-free, efficient invoice processing. Simply upload your invoices, bills, or receipts, and our cutting-edge technology takes care of the rest. With robust OCR technology optimized for Indian invoices, you can batch process up to 200 documents, easily compare data, and export in flexible formats—all while ensuring top-notch security.

Our solution is already empowering hospitals, retailers, and non-profits to streamline operations and eliminate manual errors. Are you ready to transform your accounting processes? Reach out to us today and let us help you take your productivity to the next level!

Enabling Energy Transformation: Digitizing Energy Assessments for Health Centers

One of our esteemed customers is a pioneer in solar energy. They embarked on an ambitious mission to assess the energy needs of primary health centers across multiple states. Surveyors collected detailed, handwritten data on electrical equipment like fans, lights, fridges, and even specialized medical devices, noting manufacturers and power consumption.

Faced with the challenge of digitizing this vast trove of handwritten forms, the customer turned to us. We built an AI/ML-powered solution that could transform images of these forms into precise Excel data. But here's the twist: our team didn't just rely on AI—we meticulously validated every piece of data against the original handwritten entries.

From Assam to Meghalaya, Mizoram, and Karnataka, we navigated the complexities of medical equipment names and power specs, ensuring flawless data for our customer's solar projects. The result? A digitized, validated resource that powers our customer's mission for energy transformation in healthcare. Curious how we did it? Please reach out to us.

Empowering Leaders: Generative AI Training with APD

On September 20th, WinVinaya

InfoSystems launched its inaugural training session on Generative AI and Prompt Engineering, welcoming 16 senior leaders from The Association of People with Disability (APD, India). The event was an extraordinary success, igniting enthusiasm among participants about the transformative power of AI in their roles!

The session covered diverse practical applications such as proposal creation, image creation, email writing, social media post development, meeting summarization, document summarization, video summarization, and video creation. These leaders were actively engaged, asking insightful questions and embracing hands-on exercises. The overwhelmingly positive feedback revealed participants left inspired to integrate AI into their initiatives, with many eager to recommend the training to peers.

This milestone is just the beginning! We're excited for future opportunities to equip more organizations with the innovative tools of Generative AI and Prompt Engineering.

WinVinaya Shines Bright at Zoholics India 2024!

What an extraordinary day for our inclusive team at Zoholics 2024! WinVinaya InfoSystems was proudly represented by Mr. Sivasankar Jayagopal, Mr. Baskaran, Mr. Arunkumar (a person with visual impairment), Mr. Rajat (a person with hearing impairment), and Ms. Menaga, demonstrating the transformative power of diversity and inclusion. Arun Kumar's perspectives as a visually impaired individual emphasized Zoho's commitment to accessibility, showcasing how many of their products are enhancing compliance with WCAG guidelines

for seamless navigation.

We were particularly inspired by the Vikra App, designed for sellers on the ONDC network, which has incredible potential for empowering rural MSMEs.

Engaging with Zoho leaders revealed exciting opportunities for training and placing Persons with Disabilities and women in roles across Zoho's platforms.

Rajat shared enriching insights from sessions like "What's New at Zoho?" where he noticed Zoho employees even learning Indian Sign Language to enhance communication!

A heartfelt thank you to Zoho for such inspiring sessions! We eagerly anticipate a future of collaboration and growth.

Unlocking Insights: Power BI Training for a Vehicle Manufacturer in Pune

From September 19th to 21st, we had the pleasure of conducting Power BI training for a large vehicle manufacturing company in Pune. This was a classroom training with the latest topics on data collection, data modeling, data cleaning, creating visuals, developing stunning reports & dashboards, sharing reports with the team, automatic refresh using Data Gateway, and Artificial Intelligence visuals. This engaging experience was tailored to enhance participants' data visualization and analytical skills,

allowing them to gain hands-on expertise with Power BI concepts.

The sessions were interactive, sparking curiosity and fostering collaboration among participants as they explored the power of data. Such transformative training aligns with our mission to upskill employees and promote data-driven decision-making within organizations and among their customers.

Curious about how to empower your team with similar training? Reach out to us! We are excited to bring our dynamic, interactive and customized training programs to your organization, helping unlock the full potential of your data and drive impactful outcomes. Let's embark on this journey together!

Fostering Inclusion Through DEI Services

As a leading provider of DEI services, WinVinaya recently conducted two impactful programs for MNCs, offering expert-led sessions enriched by insights from the disability community and hands-on learning experiences.

On September 12th, we hosted a Disability Awareness Orientation, equipping participants from a MNC with essential knowledge on inclusive hiring, appropriate

terminology, assistive technologies, and debunking myths surrounding persons with disabilities.

On September 23rd, we led an **Introduction to Deaf Culture and Indian Sign Language Orientation** for another MNC as part of International Sign Language Day celebration. This program offered a unique opportunity to step into the world of people with hearing and speech impairments. Participants learned basic Indian Sign Language, experienced the challenges and triumphs of a deaf person, and debunked common myths about Deaf culture.

Through these events, WinVinaya demonstrated the power of interactive learning in fostering inclusive workplaces. We're dedicated to helping organizations create environments where everyone feels valued and supported. To learn more about our DEI services, contact us today.
